

Dylan Yep

Full Stack Web Developer

Github: dyep49 - 7039671883 - www.dylanyep.com - dyep49@gmail.com

Experience

General Assembly: New York, NY

Web Development Immersive, Dec 2013 - Mar 2014
Intensive full-stack web development program, with an emphasis on Rails and JavaScript. Topics included TDD, APIs, AJAX, and Agile.

Projects

Decryptsy

decryptsy.herokuapp.com

Provides depth charts, candlestick charts, and other tools to analyze alternative cryptocurrencies. Server-side Rails, client-side AngularJS and d3.js

Time-Midpoint

midpoint-app.herokuapp.com

Calculates midpoint of two or more points in New York City by travel time. Also returns points of interest in the area as requested by the User. Server-side Rails, client-side jQuery/JavaScript

Umpire Auditor

umpireauditor.herokuapp.com/

Tracks MLB umpire performance by collecting pitch data and calculating the percentage of missed calls an umpire makes every night. Server-side Rails.
